

# Ruckus Wireless Streamlines the Month End Close and Audit Process with FloQast

---

## CHALLENGE

Ruckus Wireless needed a solution to better manage the timing of the month end close and eliminate manual work in order to focus on a more qualitative review of financial statements. Ruckus was also looking for a way to streamline the audit process, which involved compiling and retaining a hard-copy reconciliation binder for auditors.

---

## SOLUTION

FloQast provides Ruckus with one centralized location to organize and document the close process by connecting the accounting team's current folder structure, processes and systems.

*"The centralized location to house our supporting schedules and document our review comments also removed our need to retain a hard-copy reconciliation binder for the auditors, as we are now able to provide thorough audit evidence of review and sign-off directly via FloQast."* - James Walker, VP of Accounting

---

## IMPACT

- Eliminated hours and errors involved with the manual tick and tie process with ability to reconcile ERP against soft-copy Excel workbooks
- Reduced audit time and expense with organized documentation
- Improved management of month end close time and accuracy with centralized workflows and real time visibility of outstanding items
- Improved team productivity with checklist function, allowing team members to concentrate on the highest priority tasks

Client:  
**Ruckus Wireless**

Industry:  
**Telecom**

Type:  
**Public**

ERP:

*"FloQast provided us the capacity to focus more on a qualitative review of our financial statements and reduce reconciliation differences previously detected via a manual tick and tie process."*

- James Walker,  
VP of Accounting,  
Ruckus Wireless
